a. Are you now employing water conservation efforts? YES NO _____

Describe any water conservation efforts you have initiated:
SEE ATTACHMENT

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr 2001 16,300 (af/mg) yr 2002 17,000 (af/mg) yr 2003 12,300 (af/mg)

Reductions in consumptive use:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES NO

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.srcc.ca.gov>"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water division and use must be filed by riparian and pre 1914 appropriate water users as set forth in Water Code section 5100 statements of Water Division and Use. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted by riparian water users "foreign" to the natural stream system.

A riparian right is a surplus not needed by riparian water users. Generally, appropriators have been required to obtain a permit and license from the State. Appropriate rights stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system, a different watershed, may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed to the serval parcel. Generally, a riparian water user must share the water supply with other riparian users. Reservation of the riparian right to the serval parcel, have been severed from the sources of supply by an intervening parcel without the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without a difference in the riparian right to the serval parcel. Generally, a riparian water user must share the water supply with other riparian users.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in

the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without a difference in the riparian right to the serval parcel. Generally, a riparian water user must share the water supply with other riparian users.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

ITEM CONTINUATION

SEE ATTACHED SUPPLEMENTAL SHEET - C, D & F

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

See back of page for General Information. If there is insufficient space for your answers,
please number them in the space provided on the back of this form.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same source shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Division and use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their division, and (3) assists the State to determine if additional water is available for future appropriators. (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation. The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

An appropriate right is required for use of water on nonirrigated land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water from his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

Statement of Water Diversions and Use
Information Pertaining to Water Rights in California
Water Rights for Stockponds Constructed Prior to 1969
Appropriation of Water in California

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and riparian water users. Since 1914 new appropriators have been required to obtain a permit and (3) assists the State to determine if additional water is available for future appropriators, to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel with-out reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of ground water.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take

and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel.

Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statement of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water upstream from their diversion, and (3) assists the State to determine if additional use, (2) enables the State to notify such users if someone proposes a new appropriation

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
